

Douglas M. Johnson DMD

Family Dentistry
ORTHODONTICS & COSMETIC DENTISTRY

After Care Instructions

Denture or Partial

- ◆ You should remove the denture and brush it after every meal.
- ◆ If you develop sore spots from the denture, call for an appointment so we can adjust the denture. We will be placing a soft in-office reline material inside the denture sometime during the first 6 months of healing before the permanent reline is done.
- ◆ Over time dentures need to be realigned. Also Dr. Johnson recommends yearly oral cancer examinations and denture checks.

When in doubt, call us. Your comfort and care is our top priority. We're always available – even evenings and weekends – so call us at (541) 928-5414 (Albany) or (503) 394-3345 (Scio).
